Are you sure you want to log off?

Yes

No

You have successfully logged out

Login – TaskManUI

Please enter your email:

Login

Login Page:

- If correct email entered you will be redirected to main page, if not then it will come up with a suitable error message and you will have to try again.

Main Page:

- Displays your email at the top so you know who you are signed in as
- The logout button will bring up a prompt to make sure you in fact want to log out and then will redirect you to the login screen as shown in the previous page.
- The synced button will show a green dot if synced correctly and red one if not
- The settings button will bring up the connection setting screen as shown on page 6
- All info shown in database table and tasks can be selected and edited in bulk if desired
- Buttons along the top are all fairly self explanatory.

View Task:

- Clicking the view button will simply bring up the selected row's details in full
- If multiple rows are selected there will be a next and previous button so you can navigate between them with ease
- Clicking okay will bring you back to the main page

Add Task:

- Simply add all the relevant details shown on page 4 and then click ok and it will be added to the database there will be data validation so if a field is incorrectly entered it will be highlighted in red and you can try again.

Edit Task:

- By selecting one or more tasks the box will appear where you can change any of the details and then by clicking ok the task will be updated
- The next button will not appear if you have only selected one task
- The database will be updated after each task edit so you can cancel out if you selected one by mistake but want the rest to stay unchanged

Settings Button:

- Clicking this button will bring up a prompt for you to enter the admin password as behind this you can change the database URL and port for everyone as shown on page 7
